EDUCATION

Carnegie Mellon University	December 2026
Master of Information Systems Management	GPA: 3.85
Manipal Institute of Technology	August 2022
Bachelor of Electronics and Communications Engineering	GPA: 3.99
<i>Relevant Coursework:</i> Deep Learning, Generative AI Lab, LLM Applications, MLOps, System Design	

SKILLS

Languages: Python, TypeScript, Java, C++, JavaScript, SQL, Bash/Shell
AI & LLMs: Agentic Architectures, GenAI Integration, LLM Evaluation, Model Safety, Llama-3, GPT-4
AI Infrastructure & Tooling: AI SRE Tooling, Platform Engineering, Internal Productivity Infrastructure, Data Pipelines
Backend & Full-Stack: FastAPI, Spring Boot, React, Node.js, Milvus, Neo4j, Apache Kafka, Docker, Kubernetes

EXPERIENCE

BlackRock	January 2022 – August 2026
<i>AI Engineer Internship</i>	June 2026 – August 2026

- **Agentic Architectures & GenAI:** Engineered a multi-agent platform (RockAI ADK) with shared AI infrastructure, deploying robust agentic systems to automate complex financial workflows and improve productivity.
- **LLM Evaluation & Safety:** Owned best practices for safety and evaluation by creating offline-online frameworks to track data drift and LLM confidence scores, safely processing 3.5M records and \$14T in cash.
- **Data Pipelines & Infrastructure:** Designed robust data pipelines and hybrid vector-graph infrastructure linking Milvus embeddings to Neo4j, enabling highly reliable, sub-100ms GenAI capabilities.

<i>Software Developer 2 - Associate</i>	January 2025 – July 2025
---	--------------------------

- **Coding Agents & Productivity Tooling:** Built internal productivity infrastructure by engineering well-modeled TypeScript micro-frontends to translate natural language directly into JQL.
- **Architecture & Deployment:** Architected scalable Spring Boot data frameworks from scratch, deploying Azure microservices that managed complex dependencies and reduced infrastructure costs by 40%.

<i>Software Developer 1 - Analyst</i>	July 2022 – December 2024
---------------------------------------	---------------------------

- **Platform Engineering & SRE Tooling:** Developed scalable internal tooling and sharded server environments with Zookeeper, boosting system throughput to 10K+ RPS for mission-critical services.
- **Practical ML & Pipelines:** Demonstrated practical ML literacy by deploying data processing pipelines and predictive XGBoost models, evaluating tradeoffs to achieve 88% precision securely.
- **Full-Stack Engineering:** Worked comfortably across the stack by building comprehensive Azure DevOps CI/CD pipelines with integrated JUnit testing suites, ensuring a bias toward shipping production-quality code.

Shunya	June 2020 – September 2020
<i>Data Science Intern</i>	

- **Model Evaluation:** Evaluated and deployed GPU-accelerated PyTorch CV models to analyze answer sheets, reliably automating evaluations and reducing manual grading time by 90%.
- **Internal Productivity:** Addressed user learning gaps by training K-means clustering models on multidimensional assessment data, shipping algorithms that dynamically recommended targeted practice.

PROJECTS

Zulip Open-Source GenAI Extensions

- **Internal Tooling:** Built a high-throughput message engine using robust data modeling in Node.js and Redis to process live data streams into concise LLM-based summaries, driving internal productivity.

Production Recommendation & MLOps System

- **AI Infrastructure:** Developed a robust MLOps platform featuring a 4-hour retraining loop, zero-downtime model serving, and extensive evaluation pipelines via Prometheus and Grafana.
