EDUCATION

Carnegie Mellon University	December 2026
Master of Information Systems Management	GPA: 3.85
Manipal Institute of Technology	August 2022
Bachelor of Electronics and Communications Engineering	GPA: 3.99
<i>Relevant Coursework:</i> User Experience Design, Data Structures, Algorithms, Distributed Systems, Object-Oriented Programming	

SKILLS

Languages: TypeScript, JavaScript, Python, Java, C++, SQL, Bash/Shell
Frontend & UX: React, UI/UX Design, Interaction Behaviors, Clean Code, Superlative User Experience
Full-Stack Engineering: End-to-End Feature Development, Large Codebases, Node.js, Spring Boot, API Design
Data & Infrastructure: Data Models, PostgreSQL, Neo4j, Docker, Azure DevOps, Kubernetes, CI/CD

EXPERIENCE

BlackRock	January 2022 – August 2026
<i>AI Engineer Internship</i>	June 2026 – August 2026

- **Team Collaboration & Productivity:** Built end-to-end full-stack features to help teams collaborate more effectively, deploying a comprehensive platform that automated complex financial workflows.
- **Data Models & Large Codebases:** Designed robust data models and integrated a hybrid vector-graph pipeline (Milvus, Neo4j) within a large, well-maintained codebase to reliably process 3.5M records.
- **Maintainability & Clean Code:** Focused on long-term code maintainability by implementing highly diagnosable telemetry frameworks that tracked data drift securely, leaving codebases better than found.

<i>Software Developer 2 - Associate</i>	January 2025 – July 2025
---	--------------------------

- **TypeScript & React Features:** Engineered full-stack features using TypeScript and React, focusing on subtle interaction behaviors to create an intuitive UX that translated natural language directly into JQL.
- **End-to-End Quality:** Designed clean, beautiful code while balancing velocity and quality, architecting a Spring Boot data framework from scratch to seamlessly automate 1.5M+ client touchpoints.

<i>Software Developer 1 - Analyst</i>	July 2022 – December 2024
---------------------------------------	---------------------------

- **Superlative User Experience:** Worked closely with UI designers to create a superlative user experience, spearheading the end-to-end development of responsive, highly accessible frontend workflows.
- **Code Maintainability:** Improved long-term code maintainability by refactoring legacy PostgreSQL schemas on data models exceeding 50M+ rows, achieving a 37% reduction in query latency.
- **Deployment Velocity:** Built comprehensive Azure DevOps CI/CD pipelines with integrated JUnit testing suites, ensuring rapid, confident deployments for product teams to move quickly.

Shunya	June 2020 – September 2020
---------------	----------------------------

- Data Science Intern*
- **End-to-End Features:** Developed and shipped full-stack features on a Linux environment, reliably automating answer sheet evaluations and reducing manual grading time by 90%.
 - **Data Pipelines:** Addressed learning gaps by designing intuitive data pipelines that analyzed assessment data to dynamically recommend targeted practice, enhancing the overall user experience.

PROJECTS

- High-Performance Modular Booking Architecture**
- **Robust Data Models:** Engineered scalable full-stack data models and decoupled microservices using Apache Kafka, seamlessly handling bursts of 100,000+ real-time requests with high reliability.
- Zulip Open-Source Engine Extensions**
- **Team Collaboration:** Contributed clean, beautiful code to a large open-source codebase, building a high-performance message engine in Node.js to significantly enhance team collaboration and messaging.
