EDUCATION

Carnegie Mellon University	December 2026
Master of Information Systems Management	GPA: 3.85
Manipal Institute of Technology	August 2022
Bachelor of Electronics and Communications Engineering	GPA: 3.99
<i>Relevant Coursework:</i> Database Systems, Distributed Systems, Data Structures, Algorithms, System Design	

SKILLS

Languages: Python, Go (Golang), Java, C++, TypeScript, JavaScript, SQL, Bash/Shell
Backend & APIs: Reliable Backend Services, API Design, Shared Services, Core Infrastructure, System Performance
Data & Modeling: Relational Databases, PostgreSQL, Data Modeling, Event Modeling, Redis, Neo4j, Milvus
DevOps & Lifecycle: Production Lifecycle Management, Docker, Kubernetes, Apache Kafka, Zookeeper, CI/CD

EXPERIENCE

BlackRock	January 2022 – August 2026
<i>AI Engineer Internship</i>	June 2026 – August 2026

- **Backend Services:** Designed and implemented highly reliable backend services using Python and Go, powering a multi-agent AI platform to securely automate core business logic for complex financial workflows.
- **Data & Event Modeling:** Worked across deep technical domains like data and event modeling, architecting a robust pipeline linking Milvus to Neo4j via PostgreSQL to flawlessly process 3.5M records.
- **Business Impact & Scale:** Balanced technical craft with speed by rapidly deploying shared services handling 2K+ peak RPS, maximizing business impact while accurately evaluating \$14T in cash flows.

<i>Software Developer 2 - Associate</i>	January 2025 – July 2025
---	--------------------------

- **Core Infrastructure & APIs:** Built core infrastructure and highly scalable APIs from scratch using Spring Boot, allowing engineering teams to ship reliable data frameworks that automated 1.5M+ client touchpoints.
- **Service Performance:** Optimally balanced the bottom line and technical craft by implementing a distributed cache with LRU eviction, driving massive business impact by cutting API latency from 450ms to 150ms.

<i>Software Developer 1 - Analyst</i>	July 2022 – December 2024
---------------------------------------	---------------------------

- **Relational Databases:** Demonstrated strong experience with relational databases by refactoring PostgreSQL schemas on tables exceeding 50M+ rows, delivering a 37% reduction in complex query latency.
- **Development Lifecycle:** Owned the development lifecycle for key features, from implementation to production monitoring, building comprehensive Azure DevOps CI/CD pipelines to ensure secure deployments.
- **Foundational Components:** Managed foundational infrastructure for engineering teams by scaling a sharded server environment with Zookeeper, boosting system throughput to 10K+ RPS for mission-critical apps.

Shunya	June 2020 – September 2020
<i>Data Science Intern</i>	

- **Agility & Speed:** Thrived in a fast-paced environment by rapidly designing Python CV workflows on Linux, delivering immense value quickly by fully automating and reducing manual grading time by 90%.
- **Cross-Functional Collaboration:** Integrated cleanly into a cross-functional team, communicating complex technical ideas to design data pipelines that dynamically recommended targeted practice for end users.

PROJECTS

High-Performance Modular Booking Architecture

- **Event Modeling & Scale:** Engineered reliable backend services and core infrastructure using Apache Kafka, effectively utilizing advanced event modeling to seamlessly handle bursts of 100,000+ real-time requests.

Zulip Open-Source Engine Extensions

- **Shared Services:** Built scalable shared services for an open-source platform, implementing and testing a high-throughput message engine in Node.js to manage stateful data streams with zero data loss.
